PROFILE

Software Engineer with 3+ years of experience delivering scalable web applications and managing cross-functional teams. Skilled in JavaScript, React.js, Next.js, Node.js, Nest.js, Python, and FastAPI with a strong focus on backend development and DevOps. Experienced in leading multiple client projects, handling end-to-end delivery, client communications, and Agile processes. Successfully led development for Metro Cash & Carry (B2B & B2C) and other high-impact projects.

WORK EXPERIENCES

Codefinity Solutions 🔗

Software Engineer

01/2025 – Present

Johar Town, Lahore

Currently working as a Lead Developer in a project-based company, managing 5–6 client projects simultaneously. Responsible for end-to-end project delivery including client communication, requirement gathering, and translating business needs into technical solutions. Leading and mentoring the development team while ensuring timely execution through Agile methodologies. Primarily focused on the MERN stack along with Python and FastAPI for building scalable and high-performing applications

Xcentric Services 🔗

Mern Stack Developer || Team Lead

05/2022 – 02/2025

DHA Phase 1, Lahore

Progressed from Junior Software Engineer to Team Lead at Xcentric, managing the product team for Metro Cash & Carry B2B and B2C. Designed and developed scalable solutions using the MERN stack with a primary focus on backend and DevOps. Led sprint planning, code reviews, and Agile ceremonies to ensure timely delivery. Collaborated cross-functionally to implement business-critical logic and optimize system performance.

SKILLS & TOOLS

- | | | |
|--|--|------------------------------------|
| • JavaScript / TypeScript | • React.js / Next.js | • HTML / CSS / UI Libraries |
| • Node.js / Nest.js / Express.js | • SQL / NOSQL Databases | • Python / FastApi |
| • Github / Gitlab / Bitbucket | • CI/CD Pipelines | • Cloud Services (AWS, GCP, Azure) |
| • Docker (Containerization & Deployment) | • Third Party Integrations (Stripe / Firebase / Google Analytics and many more.) | |

SOFT SKILLS

Client Communication

Experienced in engaging directly with clients to gather requirements, provide progress updates, and ensure alignment between business needs and technical solutions. Skilled at building long-term client relationships through clear and effective communication.

Team Leadership & Mentoring

Led cross-functional teams by setting clear goals, managing sprints, and conducting code reviews. Focused on mentoring junior developers, fostering collaboration, and driving team productivity.

Problem-Solving & Critical Thinking

Strong ability to analyze complex technical challenges and deliver efficient, scalable solutions. Adept at troubleshooting issues under pressure while maintaining system stability and performance.

Decision Making & Ownership

Proactive in making informed decisions to keep projects on track and within scope. Take full ownership of project delivery, ensuring accountability and high-quality outcomes.

PROMINENT PROJECTS & WORKS

METRO (B2C & B2B) [↗](#)

METRO is the e-commerce solutions for retail and wholesale with advanced features. Developed and led the Metro Cash & Carry B2B and B2C platforms, two large-scale supermarket applications serving wholesalers and customers. Implemented key features such as product ranking, vouchers, promo codes, delivery management, and secure payment gateways. Built using the latest technologies including the MERN stack, along with robust admin panels for efficient operations.

WALTZ AI [↗](#)

Waltz AI is an AI-powered platform that enables users to create and publish landing pages on both predefined and custom domains. The system also provides AI-driven image generation, as well as tools to design, manage, and run email campaigns seamlessly. Built using the MERN stack and FastAPI, the platform delivers a modern, scalable, and fully automated digital marketing solution.

TAPPLIO [↗](#)

TAPPLIO [↗](#) is a REST API and real-time data provider for technical analysis indicators on US stocks and cryptocurrencies. As a Backend Engineer, I integrated and managed candle and stock data across multiple exchanges, including Binance and others. Focused on ensuring accurate, high-performance data processing to support real-time trading and analysis workflows

OODA Trader

OODA Trader is a next-generation trading and community platform that empowers traders to create, sell, and share their market analyses. The platform integrates on-chain, exchange, and social data to provide advanced scanners, predictive analytics, and asset insights. It also features community rooms, 1-on-1 and group chats, and social engagement tools, enabling traders to build communities while monetizing their expertise. Currently under development, OODA Trader combines trading intelligence with social networking for a complete trading ecosystem.

Executive Infusion [↗](#)

Executive Infusion is the platform that provide the services to its customer to book an appointment online and also able to provide related services.. Developed using React JS, Redux Toolkit, Node JS, Express JS.

AREAS OF INTERESTS

Strong interest in backend development and DevOps, with a focus on building scalable, secure, and high-performing systems. Passionate about designing and optimizing system architectures, solving complex real-world problems through technology, and advancing toward a future role as a Core Architectural Design Engineer.
